

Getting started with secondary data analysis

Maureen Haaker Alle Bloom

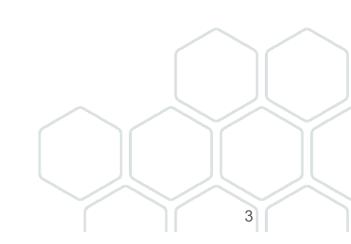

Overview

- What is secondary data?
- Methodology of reusing data
- Finding your data and making sense of it
 - Documentation
- Quantitative and qualitative examples
 - Key issues in re-using data
 - Key resources available
 - Activities
- Q&A

Have you re-used existing data before?

What is secondary data?

Data collector

Office for

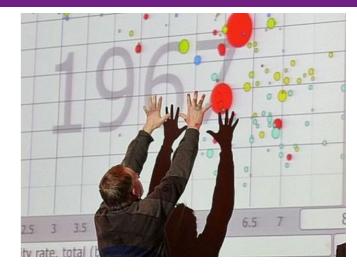

Primary research

Data collection & analysis for planned purpose

Secondary analyst

Data

Sharing

Secondary research

Re-analysis (can be for a different purpose)

Pros and cons of re-using data

Pros

Cons

- Access datasets impossible to create
- Cost effective

Ethical issues about data collection dealt with

No need to re-contact data subjects

Data is high quality

Do not have insider understanding of data and data collection

Effort to get to know the data

Ethical issues about data use to consider

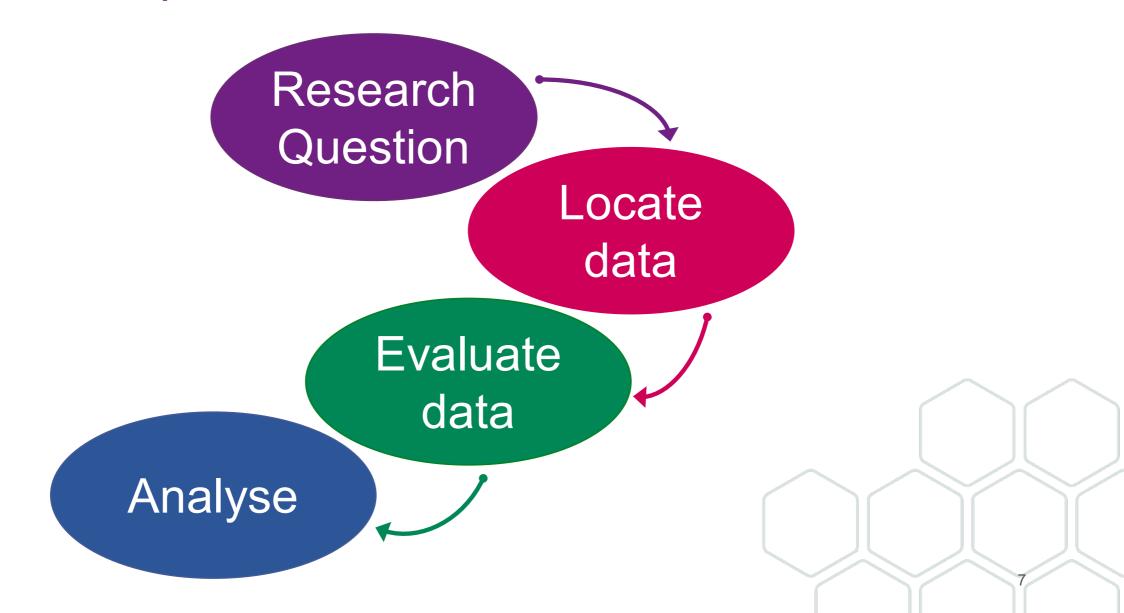

Data may not match research question

Cannot extend studies

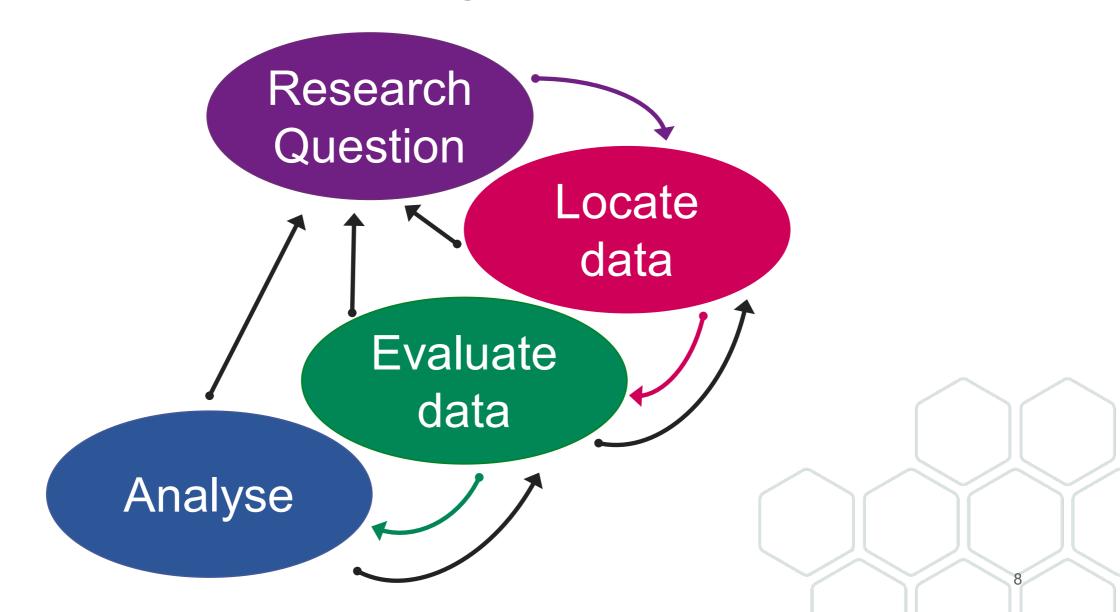

Researchers reusing data need to:

- 1. Make effort to understand the data
- 2. Be pragmatic about whether data are good enough for your purpose

Research plans ...

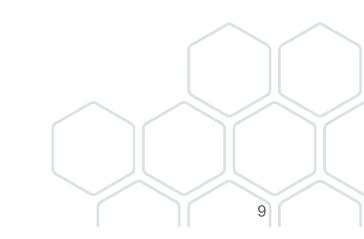

... often involve repeating steps

How to find data

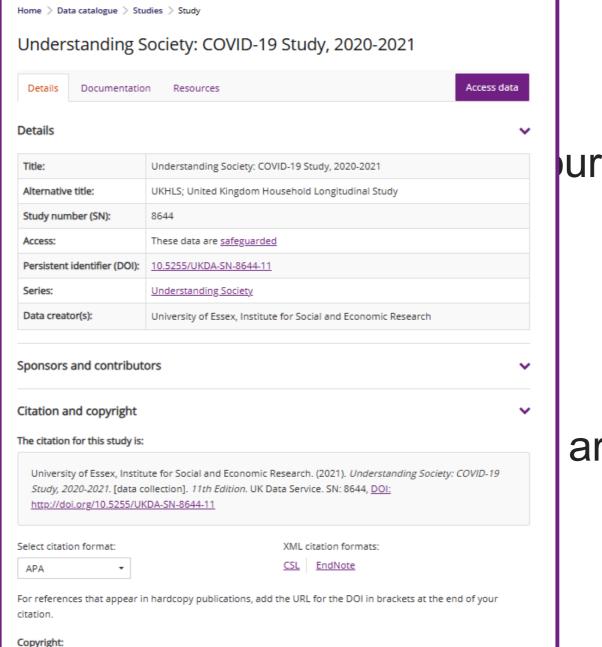

- UKDS catalogue search
- Find data pages
 - Theme pages
 - Data types

Making sen

- To understan research you
- what inform
- from whom
- when and w
- any change

archived

Use the documentation

- User Guides
- Questionnaires
- Interview Schedules

Plus a variety of other resources

Practical activity: Documentation

Using secondary quantitative data

Quantitative data

- What data is available?
- Case study
- Key issues

Quantitative data by type of analysis

Type of analysis	Type of data
Individuals, families, households, businesses : one point in time	Cross-sectional surveys
Individuals, families, households, businesses : multiple points in time	Repeated cross-sections
Individuals, families, households: over time	Longitudinal data
Small geographic areas	Census aggregate data, flow data
Comparing countries (over time)	International time series

Case Study: Crime Survey for England and Wales (formerly the British Crime Survey)

- Example of a repeated cross-sectional survey
- Important source of information about crime (crime statistics independent from police records)
- Annual survey
- n≈35,000 individuals aged 16+ and 3,000 aged 10-15
- Victim of a crime in the previous 12 months
- Covers demographics, attitudes to the police and the CJS

Case Study: Crime Survey for England and Wales

Data stored as individual anonymised records

	rowlabel	split	sex	yrsarea	work2
1	137068050	A (Experiences o	Female	20 years o	Yes
2	147461190	C (Crime preven	Female	10 years b	No
3	137116250	A (Experiences o	Female	20 years o	No
4	147354190	C (Crime preven	Female	20 years o	Yes
5	137061230	C (Crime preven	Female	20 years o	No
6	136898230	C (Crime preven	Female	20 years o	No
7	135507330	A (Experiences o	Male	10 years b	Yes

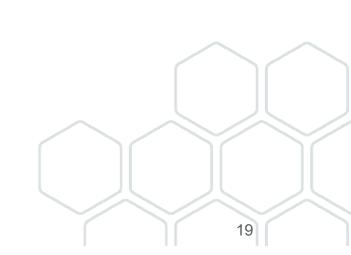

Different levels of access

- A standard End User Licence (download after registering)
- Secure Access (for sensitive information)

Hind Khalifeh et al (2013)

Examined violence against people with disability in England & Wales

- British Crime Survey 2009/10
- introduction of disability measures
- (a special licence version of the data)
- n = 46,398 adults 16+
- 9,037 had at least one limiting disability

Hind Khalifeh et al (2013) – Findings

Adjusting for age, sex, socio-economic characteristics...

- disability increases risk of experiencing violence
- levels of victimisation highest amongst those with mental health problems
- estimated 116,000 victims of violence attributable to disability

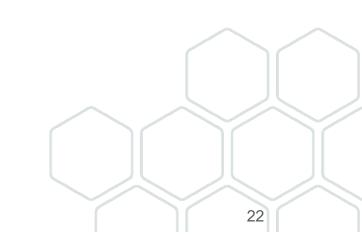

Sampling considerations

- Surveys are based on samples
- Is the sample representative?
 - Who is included (adults, those in private address)?
 - Response rate and bias
 - Do you need to apply a weight to make the data representative?

Sampling considerations – sample size

Do I have enough cases to make a precise estimate?

Important for small sub-populations

Cite the Data

- Citations provided for every record and dataset
- Use the UK Data Service citation tool to copy and paste the correct citation

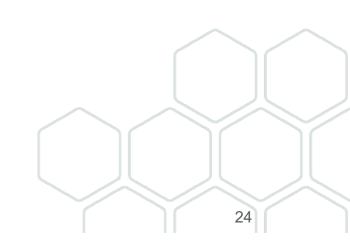

itation and	opyright

Using secondary qualitative data

Maureen Haaker Alle Bloom

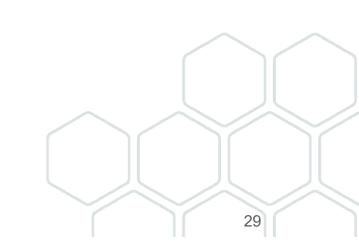

Copyright © 2023 University of Essex, Created by UK Data Service.

Reusing qualitative data

- Types of qualitative data reuse
- Case study: School Leavers Study
- Browsing and searching for data with QualiBank
- Key issues
 - Re-contextualisation

Many ways of re-using data

- 1. Description
 - See more data, not limited to published extracts
- 2. Research design and methodological advancement
 - Study sampling, data collection methods, topics guides
- 3. Reanalysis
 - A research question different to the original research
- 4. Restudy
 - Replicate and compare

SN 4867: School Leavers Study

Principal investigator: Ray Pahl

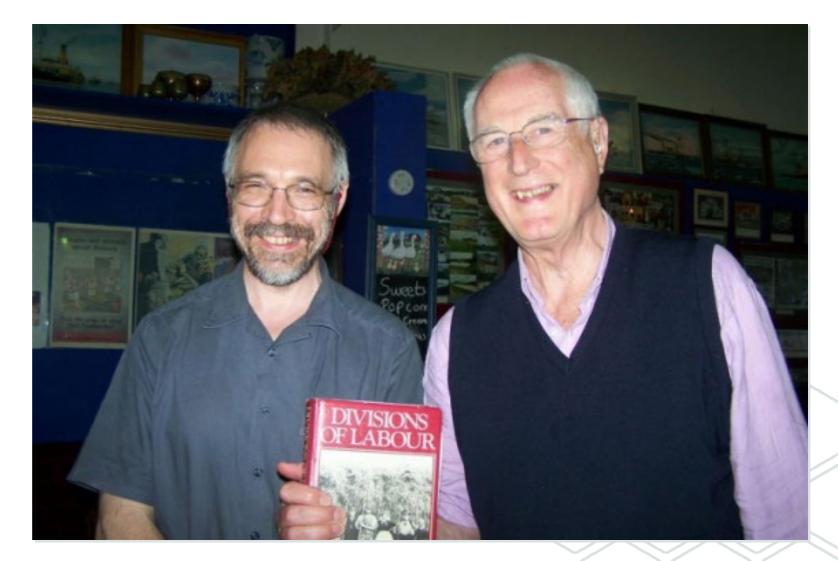

In 1978, teachers at a comprehensive school on the Isle of Sheppey were asked to set an essay about 10 days before pupils were due to leave school. They were then asked to write an imaginary account of their life over the next 30 or 40 years.

School Leavers Re-Study: Imagining the Future

Principal Investigators: **Graham Crow** (University of Kent) Dawn Lyon (University of Southampton)

School Leavers Re-Study

Essay instructions 2010: Imagining the Future:

I want you to imagine that you are towards the end of your life. Look back over your life and say what happened to you. Spread your story over your whole life from the time of leaving school.

> Sheppey: Essay 30 Group: Boys

My Past

I was sitting in front of the fire smoking my pipe, just thinking of the past. I was nearly seventeen when I left school, I had an apprenticeship in the Tudor Glass, an electrical apprenticeship lasting four years, I served my four years and got my diploma for an electrical engineer. I was now twenty and courting a rearly lovely girl. I had to work in London in my next job and came back home every weekend. Jobs were scarce so you had to take what you can get, I didn't want to go to London,

33

Living and Working on Sheppey study

1978: 141 essays (89 boys and 52 girls) Living without a job: how school leavers see the future

2009-10: 110 essays (55 boys and 55 girls) Living and Working on Sheppey project

Together, these two sets of essays shed light on the aspirations of Sheppey's young people (and young people more generally) and cover a range of topics including:

• Health, Education, Career, Family and Leisure

Comparing the responses from 1978 and 2010

1978	2010
Mundane & grounded jobs; gradual career	Well-paid, instantaneous jobs; choice but

Welcome to this website where you can find material from two research projects about the Isle of Sheppey!

Our latest work (2013-14) is a project called **Imagine Sheppey** which is about how young people imagine the future. This builds on our previous work in **Living and Working on Sheppey: Past, Present and Future** (2009-11) where we explored the history and changes in working lives on Sheppey in the last decades of the 20th century and into the 21st. You can find out about both projects here!

If you are curious about young people and wonder about how they see the world and themselves within it, and what they imagine their futures have in store for them, you might be interested in:

	🛨 Additional metadat	a	
	INTERVIEW TRA	ANSCRIPT	~
	R: 149 Lee Gate, Ha	rwood, Bolton.	
	I: And your marital	status? You're a widow, are you?	
	R: Yes.		
	I: Can you tell me w	vhat year you were married?	
	R: June 18th, 1938.		
	I: And the year whe	en you were born?	

	R: Oh yes, that was done. The Maypole dances.
Create citation	I: Where did they have the Maypole?
	R: Well of course I remember St. Osyth Priory - I lived just inside St. Osyth then you see, my father and mother moved from Angers Gree to - I told you about the barracks - we moved there when I was - not more than about two I suppose.
	I: And you lived on there for quite a while didn't you?
	R: I lived there 'til I got married. Yes.
	I: Why did they make that move?
	R: Well, of course they moved - lived in a house at Angers Green, I don't know who that belonged to but then of course as these barrack cottages became vacant I mean the farmer usually put his men in them you see. That was why my father moved 'cos-;
	I: It wasn't because he changed his employer?
	R: Oh no, the house went with the job you see.
	I: And at St. Osyth in Priory they used to have a Mayday do did they?
	R: Oh yes. Well they had - a lot of big do's there when I was a kid, I mean, I belonged to the Sunday school, I used to have all their treats there - their summer treats you know. And of course the woman then who had it - was a very rich woman you see those days, I mean they had about seventeen gardeners and - and seventeen or eighteen indoor staff.

Getting started

Orient yourself to the original research project

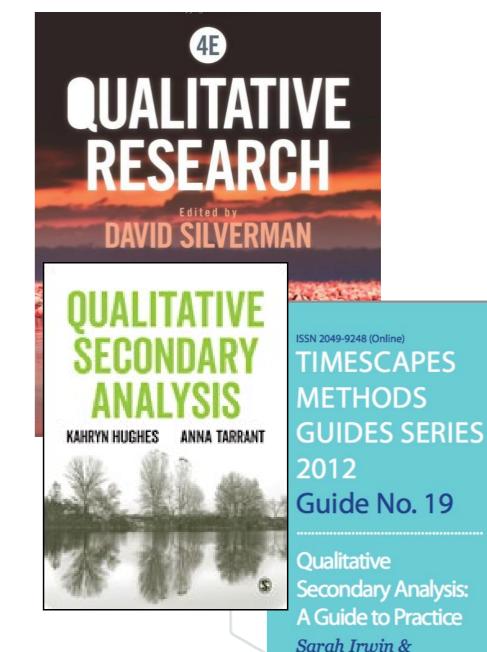

Documentation and metadata

Understand the structure of the original data

- Context at 3 levels
- Sampling and recruitment

Become familiar with the project data as a whole

- Logic of subsampling is volume prohibits reading it all
- Both inductive and deductive strategies can work

Mandy Winterton
